PROFILE

A dedicated and multi-talented individual seeking opportunities to contribute my skills in software development, driving, and other relevant fields. My aim is to achieve success, discover my purpose, and explore the vast wonders created by God.

EDUCATION

November 2023 – March 2024
Nairobi, Nairobi

Moringa School, Certificate
As a software engineering student at Moringa School, I went through an intensive program focused on both frontend and backend development. Here's an overview of what I have done:
Activities and Learning at Moringa School:

- **Coding Fundamentals:** Mastered programming languages like JavaScript, Python, or Ruby, along with essential coding concepts (data structures, algorithms, etc.).
- **Frontend Development:** Learned to build responsive websites and user interfaces using HTML, CSS, and JavaScript frameworks like React or Angular.
- **Backend Development:** Gained experience with server-side technologies like Node.js, Django, or Ruby on Rails, focusing on API development, database management, and server operations.
- **Project Work:** Completed multiple hands-on projects, from small coding challenges to larger capstone projects that involved building full-stack applications.
- **Collaboration and Agile Methodologies:** Worked in teams using Agile methodologies, including sprints, stand-ups, and code reviews, to develop software.

- **Version Control:** Used Git and GitHub for code versioning and collaboration.
- **Problem Solving and Debugging:** Enhanced problem-solving skills through debugging exercises, coding challenges, and algorithms practice.
- **Soft Skills Development:** Improved communication, teamwork, and project management skills through presentations, group work, and peer reviews.

At Moringa School I have equipped with practical experience in software development, preparing you for roles in tech like software engineering, full-stack development, or tech support.

April 2023 –
September 2023
Nairobi, Nairobi

Institute of Advanced Technology, Certificate

ICDL (International Computer Driving License) students typically learn essential digital skills that are recognized internationally. The program covers a wide range of basic to intermediate computer competencies. Here's what students typically learn:

Key Areas Covered in ICDL:
- **Computer Essentials:**
- **Word Processing:**
- **Spreadsheets:**
- **Presentations:**
- **Online Collaboration:**
- **IT Security:**
- **Database Management (Advanced Modules):**

Skills Developed in ICDL:
- Proficiency in essential office software tools (Microsoft Office, Google Workspace).
- Effective online communication and collaboration skills.
- Knowledge of safe and responsible technology use.
- Fundamental IT and computer literacy applicable across various industries.

ICDL certification equips students with practical and widely applicable digital skills, making them well-prepared for most administrative, clerical, or technical roles.

PROFESSIONAL EXPERIENCE

May 2024 –
August 2024
Kisumu, Kisumu

John Mwangi, IT Manager, East African Community
Work Experience
Tech Assistant Intern *East African Community, Kisumu, Kenya May 2024 – August 2024*
- Assisted the computer department with various technical tasks and troubleshooting.
- Provided support for software installation and maintenance.
- Gained experience in collaborating within a large regional organization.

SKILLS

Driver ● ● ● ● ●
Professional driver, whos capable of driving any vehicle, with a maximum of 4 wheels

Cook ● ● ● ○ ○
